**SUPPORT**

**KUBARK Policy Concerning Shipment/Storage of Household Effects as Applicable to [REDACTED]**

25X1A6a

25X1A6c

**REFERENCE:** [REDACTED] dated 1 November 1977; Subject: Shipping and Storage of Household Effects

**ACTION REQUIRED:** None, for your information.

1. Your referenced dispatch relative to the storage or shipment of effects for personnel assigned to your Station has focused attention on the necessity of clarifying the situation for all concerned. In order to do this it is advisable to go over the factors bearing on the case as follows:

- a. Approval to store effects at KUBARK expense was approved by the Acting Director 1 September 1956.
- b. Public Law 600 authorizes the shipment of 6750 lbs. gross or 7000 lbs. net for personnel with dependents and Executive Order 9805 authorized the shipment of 3125 lbs. gross or 3000 lbs. net for single personnel.
- c. All houses and billets at your Station are furnished.
- d. [REDACTED] defined weight allowances by grade.

25X1A6c

2. In applying the factors listed above, attention was first directed to Item 1 d which, since issue has been determined to be beyond the scope of approval authorized by the Acting Director (1 a).

3. In Public Law 600 and Executive Order 9805 (1 b) both gross and net weights are outlined. However, Comptroller General decisions have limited shipments going overseas to gross weights while making it possible to utilize the net figure for storage purposes. This means that materials being stored in the United States will be assessed only 25% for inclusion of packing materials instead of the 40% required by KUBARK Regulations.

25X1A6c

4. Personnel returning to the United States on PCS orders will be authorized to ship home the difference between the gross they have in storage and the authorized gross of 3750 or 3125 lbs. whichever applies.

5. In view of the fact that quarters at your Station are furnished (1 c), shipments going to the field will be limited to the following gross figures 4,500 lbs. married or 2750 lbs. single.

6. In order to protect individuals now at your Station who shipped and/or stored effects under the provisions of (1 d) above it is necessary that we now determine the total weight of effects shipped and stored. Records in Headquarters reveal only total in storage since shipment was prepared by [REDACTED]. It is, therefore, necessary that the total shipped per individual be furnished Headquarters.
